A survey of the use of crowdsourcing in software

engineering

1/4/2017 · 1. Introduction. Crowdsourcing is an emerging distributed problem-solving model based on the combination of human and machine computation. The term ‘crowdsourcing’ was jointly 1 coined by Howe and Robinson in 2006 (Howe, 2006b). According to the widely accepted definition presented in the article, crowdsourcing is the act of an organisation outsourcing

Resistors and Capacitors in Parallel | Department of ...

Introduction. In this final section we examine the frequency response of circuits containing resistors and capacitors in parallel combinations. As with the previous section we can use the DC analysis of resistor parallel circuits as a starting point and then account for the phase relationship between the current flowing through the resistor and capacitor components.

aDifferent places around the best agent can be reached with respect to the current position by adjusting the value of A and C vectors. For instance, $(X^* - X, Y^*)$ can be reached by setting $A = (1, 0)$ and ...

Density-Based Clustering

2/12/2020 · In the domain of anomaly detection, this causes problems as anomalous points will be assigned to

the same cluster as “normal” data points. The anomalous points pull the cluster centroid towards them, making it harder to classify them as anomalous points. In this blog post, I will cover a family of techniques known as density-based clustering.
