openvpn - How to force all traffic through VPN? -

Server Fault

The gateway ip for my network is 192.168.0.1 and the gateway for openVPN is 10.8.0.1. I have done trace route and it shows that the websites that don't work access 192.168.0.1 and not 10.8.0.1. How would I force all of the traffic through the vpn? I am running windows 7 as the client and ubuntu 10.04 for the server.

Traffic congestion - Wikipedia

Traffic congestion occurs when a volume of traffic or modal split generates demand for space greater than the available street capacity; this point is commonly termed saturation. There are a number of specific circumstances which cause or aggravate congestion; most of them reduce the capacity of a road at a given point or over a certain length, or increase the number of vehicles ...
