Applications and Characteristics Of Overcurrent Relays ...

25/5/2020 · 50/51 and 50/51N relays.

Overcurrent relays are the most commonly-used protective relay type. Time-overcurrent relays are

available with various timing characteristics to coordinate with other protective devices and to

protect specific equipment.

Instantaneous overcurrent relays
have no inherent time delay and are

used for fast short-circuit protection.

Current transformer - Wikipedia

A current transformer (CT) is a type of transformer that is used to reduce

or multiply an alternating current (AC). It produces a current in its secondary which is proportional to

the current in its primary. Current transformers, along with voltage or potential transformers, are instrument

transformers. Instrument transformers scale the large values of voltage or

current too small, ...
