Ontology
(information science)

- Wikipedia

In computer science and information science, an ontology encompasses a representation, formal naming and definition of the categories,

properties and relations between the concepts, data and entities that substantiate one, many, or all domains of discourse. More simply, an ontology is

a way of showing the properties of a subject area and how they are related, by defining a set of concepts and ...

Automation -

Wikipedia

Industrial automation is to replace the human action and manual command-response activities with the use of mechanized

equipment and logical programming commands. One trend is increased use of machine vision [104] to provide automatic inspection and robot guidance functions,

another is a continuing increase in the use of robots.
