Human nutrition - Wikipedia

Human nutrition deals with the provision of essential

nutrients in food that are necessary to support human life and good health. Poor nutrition is a chronic problem often linked to poverty, food security, or a poor understanding of nutritional requirements. Malnutrition and its consequences are large contributors to deaths, physical deformities, and disabilities worldwide.

10/1/2022 · Ghrelin seems to be secreted by your body,
not only when it needs food but also when it

anticipates food (that's why you start craving food after seeing a tasty food video/ad), now for the funny part, it also is influenced by meal timing, meaning that if you eat every day at regular interval your level of ghrelin will go up and peak slightly before the actual meal.
