### **Shades of green - Wikipedia**

Harlequin is a color described as being located between green and yellow (closer to green than to yellow) on the color wheel. On color plate 17 in the 1930 book *A Dictionary of Color* (see reference below), the color harlequin is shown as being a highly saturated rich color at a position halfway between chartreuse and green. Thus in modern color terminology, harlequin is the color halfway ...

### **The Meaning of Colors - Changing minds**

Men also see green things as more yellow than women. Women are less sensitive to color in the detail of objects and also in things which are moving quickly. Red has been associated with romance and an American experiment offering dates with identical pictures of the same woman in different colored dresses found that a red dress was most effective in stimulating male desire.
