## **Dimensional modeling - Wikipedia**

Dimensional modeling (DM) is part of the Business Dimensional Lifecycle methodology developed by Ralph Kimball which includes a set of methods, techniques and concepts for use in data warehouse design.: 1258–1260 The approach focuses on identifying the key business processes within a business and modelling and implementing these first before adding additional business processes, as a bottom ...

## **Decision support system - Wikipedia**

A decision support system (DSS) is an information system that supports business or organizational decision-making activities. DSSs serve the management, operations and planning levels of an organization (usually mid and higher management) and help

people make decisions about problems that may be rapidly changing and not easily specified in advance—i.e. unstructured and semi-structured ...

### **AWS Architect Resume Samples | Velvet Jobs**

### **Load testing SQL Server using HammerDB | Compute Engine ...**

19/11/2021 · In this case, the Number of Warehouses (the scale) is set to 2000, but you don't have to set it that high, because creating 2000 warehouses will take several hours to complete. Some guidelines suggest 10 to 100 warehouses per CPU. For this tutorial, set this value to 10 times the number of cores: 160 for a 16-core instance.
