**Fixed income analysis - Wikipedia**

Fixed income analysis is the process of determining the value of a debt security based on an assessment of its risk profile, which can include interest rate risk, risk of the issuer failing to repay the debt, market supply and demand for the security, call provisions and macroeconomic considerations affecting its value in the future. It also addresses the likely price behavior in ...

### **Convertible security - Wikipedia**

A convertible security is a financial instrument whose holder has the right to convert it into another security of the same issuer. Most convertible securities are convertible

bonds or preferred stocks that pay regular interest and can be converted into shares of the issuer's common stock. Convertible securities typically include other embedded options, such as call or ...
